Continuation of 11. does NOT place the application in condition for allowance because: with respect to applicant's argument that the reference of Sayers et al. does not show the claimed limitation "a housing defining an internal liquid reservoir". The examiner disagrees with applicant's argument because the reference of Sayers et al. specifically shows a housing (102) that defines an internal liquid reservoir (110). Further, applicant argues that the reference of Sayers et al. does not show the claimed limitation "a mounting assembly configured for mounting on a supporting wall structure, said housing with internal liquid reservoir and dispensing pump mechanism being completely removable from and replaceable relative to said mounting assembly". Please note that the reference specifically shows a mounting assembly (104) which is supported on a wall structure (col. 5, ll. 26-28) and as seen in Figure 3 and the structures of Sayers et al. are capable of performing all the functional claimed limitations. Applicant argues that the reference does not show an actuator. As seen in Figures 1,4,6,11B and 12, elements (150,364) being used as an actuator to activate the pump mechanism.
